

**Associate / Professional, Purification  
Allergan, Inc.**

**The Company:**

With more than 55 years of experience providing high-quality, science-based products, Allergan, Inc., with headquarters in Irvine, California, discovers, develops and commercializes products in the ophthalmology, neurosciences (BOTOX), medical dermatology, medical aesthetics, obesity intervention and other specialty markets that deliver value to its customers, satisfy unmet medical needs, and improve patients' lives.

**The Opportunity:**

Work in matrix environment to develop efficient, robust, and scalable purification processes for protein therapeutics. The primary role of this position is to complete chromatography, electrophoresis and filtration experiments in the Biopharmaceutical Process Sciences Department. The individual will also provide support to existing clinical and commercial purification processes and for the technical transfer of future processes to clinical and commercial facilities. The individual will be a strong supporter of safety and safety initiatives in the laboratories.

**Requirements:**

- MS in Biochemical/Chemical Engineering or a related Biological Science field with 0-4 years of industrial experience or a BS in Biochemical/Chemical Engineering or a related Biological Science field with 0-7 years of industrial experience.
- Knowledge of the concepts, procedures and equipment common to protein purification is required.
- Familiarity with statistical-based design of experiments is required.
- Demonstrated ability to multi-task and retain flexibility in a dynamic environment is required.
- Strong written and oral communication skills and the motivation to work in a team environment is desired.
- Experience with regulatory documentation and compliance is desired.
