

ISPPP 2011, October 23-26, Alexandria, Virginia

Joe DeStefano, Chairman www.isppp.org

Dear Colleagues,

The **31st International Symposium on the Separation of Proteins, Peptides, and Polynucleotides (ISPPP)** is being held in Alexandria, Virginia from Sunday, October 23 through Wednesday, October 26, 2011. The ISPPP Symposium series is the premier meeting for learning about state-of-the-art separation, analysis, and characterization methods as applied to the biological sciences. It brings together many of the world's leading scientists to discuss new advances and applications of interest to bioanalytical scientists and process engineers. I encourage you to place this meeting on your exhibition calendar for 2011.

The ISPPP meeting provides a unique opportunity for you to showcase your products to a focused population of potential customers from around the world. We invite you to support ISPPP 2011 by a sponsorship and participation in the exhibition. The ISPPP 2011 exhibition will give a unique opportunity to present and to promote your products to specialists in the field of bioseparation science and related techniques.

What will ISPPP include? As in past years, the symposium features a number of lectures, posters, workshops, and symposia of interest to the bioscientific industry, including:

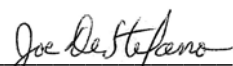

- Analytical and Preparative Separation Technology Advances
- Downstream processing Techniques
- Proteomics/Glycomics/Metabolomics
- HPLC/Mass Spectrometry

ISPPP is multi-disciplinary in nature to provide attendees with information about the latest advances in their own fields of interest as well as insights into related fields. The conference website (www.isppp.org) contains more detailed information about the conference.

The enclosed forms provide all the details on exhibitor and sponsor opportunities. For further information, contact Sheila at smc@giuffrida.org.

We look forward to hearing from you soon.

Sincerely,

Joe DeStefano
Chair, ISPPP 2011

Sheila Crowley
ISPPP 2011, Conference manager
