

Position Title: Research and Development Associate II/Associate Scientist I

Department Name: Research

Location: Gaithersburg, MD

Job ID: 2200-055

We are seeking a protein biochemist with greater than 1-3 years of pharmaceutical or biopharmaceutical experience, to help prepare and characterize protein reagents in support of preclinical research activities. The successful candidate will have broad experience in purification and characterization of proteins and antibodies, especially from recombinant sources. An in-depth understanding of protein structure/function is highly desirable. Excellent written and oral communication skills are necessary.

Education: Minimum B.S./M.S. or equivalent in biochemistry or related field • **Experience:** 1-3 years pharmaceutical or biopharmaceutical experience • **Special Skills/Abilities:** • Expertise in general protein purification techniques, and significant background in the characterization of proteins and antibodies, including western analysis, ELISA, HPLC • Experience with biophysical techniques for protein purification • Outstanding verbal and written communication skills are required • Well organized and able to prepare reports, summaries, and protocols. **Job Complexity:** Must possess significant independence at the lab bench. Will be required to balance laboratory work (multiple, simultaneous projects) and team interactions.
